THOROUGHLY CLEAN YOUR MOUTHPIECE, INSTRUMENT ,AND REED.

Cleaning a musical instrument can be difficult and inconvenient for woodwind and brass instrument players. Most musicians use different methods of wiping, but real health concerns come from germs that cannot be seen with the naked eye in hard-to-reach corners of an instrument. The build-up of germs can be detrimental to a musician's health and respiratory system.

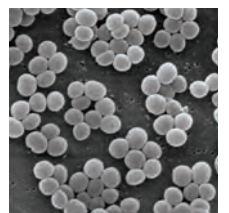

The Silverstein Light is ergonomically designed to sanitize mouthpieces, instruments, and reeds with the use of ultraviolet and ozone technology. The Silverstein Light has been lab tested against various strains of bacteria and infection-causing microbes that may lead to variety of health concerns and deterioration of the immune system. Make sure to thoroughly and properly sanitize your woodwind and brass instruments readily at your convenience with the Silverstein Light.
